Editing the Printer Information on Your Chromebook	10

If you are unsure if your printer supports Chromebook, check the list of supported models.

- Functions and features may vary by printer model.
- Please note that scanning requires Chrome OS 89 or later.
- To setup and use your printer with Chromebook, your printer must be on and connected to the same Wi-Fi network as your Chromebook or connected with a USB cable.
- Actual screens may vary from those shown in this guide.

Setting Up Your Canon Printer On Your Chromebook

Scan

Print

Select **Advanced**, either from the side menu of the settings screen, or by scrolling to the bottom and clicking it.

٩.	Dearch and Assertant		

Your Chromebook will detect printers connected via **USB as well as WiFi printers** already on the network.

If your printer is not on your network but has an LCD, it is easiest to follow the instructions with your printer to make the connection via LCD. If you are still having difficulty getting the printer on your network, or your model does not have an LCD, we recommend using the **Canon Print app** on your smart device to complete setup.

After clicking **Setup**, you will see your printer added to the **saved printers** list.

If this is the first time you are setting up a printer, the default **Destination** in the **Print** interface is often **Save as PDF**, and you will need to manually change it to your Canon printer.

Scan

If you do not see the printer in the dropdown, click **See more...** to **Select a destination**, and choose your printer.

2

Confirm your Canon device is the selected scanner, adjust any other settings as needed, and click **Scan**.

Source options may vary based on your device's capabilities (such as if it has a document feeder).

You can choose between several file types for your scan output.

Editing the Printer Information on Your Chromebook

It is strongly recommended that only advanced users manually edit their printer information.

 Navigate to the saved printers list: Settings > Print and Scan > Printers **2.** Click the 3 dots next to the printer next to the printer.

3. Choose Edit.

4. Change the printer name or other settings, then click **Save**.
